THE EDITO

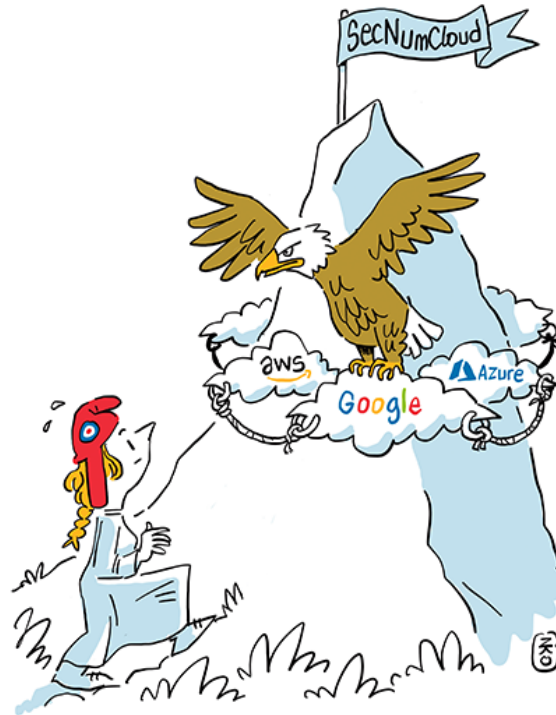

The Long March Toward Sovereign Cloud

As the election of the new U.S. president raises questions, the dominance of American cloud providers remains overwhelming. Yet, France has launched an ambitious policy to lay the groundwork for a sovereign cloud.

Applications and challenges for the future european constellation Iris2

By Guizmo

On October 30, Brussels awarded the SpaceRISE consortium the contract for the European satellite connectivity constellation project Iris2. The Iris2 constellation, which stands for “Innovative Radiocommunications Infrastructure and Services,” is designed to meet the growing demand for high-speed connectivity services in Europe.

The French Council of State Upholds the Hosting of Health Data Hub by Microsoft

By the Editorial Team

On November 13, 2024, the French Council of State rejected the appeal filed by the InterHop association, supported by several organizations, against the hosting of the Health Data Hub’s health data by Microsoft. The plaintiffs argued that this decision potentially violated the General Data Protection Regulation (GDPR) due to risks associated with access to data by U.S. authorities under the Cloud Act.

Strengthening France's Strategic Position in the Undersea Cable Sector

 By Béatrice Ghorra

Although France benefits from an ideal geographical location—at the crossroads of major maritime routes and open to several seas and oceans—it has long underestimated the strategic role of undersea cables.

Linking health insurance card and Id Card: a good idea to combat social fraud?

 By Fabrice Deblock

Estimated at approximately 4 billion euros by the Court of Auditors, fraud in health insurance benefits is now under scrutiny by the French government. But are the proposed measures the most effective way to reduce the cost?
