## # L'ÉDITO

In 2025, Europe enters a pivotal year for cybersecurity, marked by the implementation of new regulations such as NIS2 and the Cyber Resilience Act (CRA). These regulatory frameworks offer a crucial opportunity to enhance collective security and scale up efforts, but they also bring challenges: compliance costs, operational constraints, and risks of market distortions. While technological libertarianism prevails across the Atlantic, Europe has a unique opportunity to establish itself as a model of digital security built on trust and sovereignty. May 2025 be an ambitious year, resolutely focused on a safer digital future. Wishing all our readers a very happy new year!

### InCyber Defense: At the Heart of European Cyber Commands

By Adèle Forveille

Episode 1: General Michel Van Strythem – Belgium

The Cyber Command was inaugurated on October 19, 2022, at the Proximus Hall in Evere (Brussels). The former Belgian Chief of Defense (CHOD), Admiral Michel Hofman, had suggested to the Minister of Defense, Ludvine Dedonder, to establish Cyber as the fifth full-fledged Component of Defense.

### Zero Trust, an ambitious but complex approach

By Xavier Biseul

Challenging the perimeter-based logic that demands a complete paradigm shift while large enterprises are leading the way, this approach is slowly beginning to democratize.
