NIS2, DORA and CRA: 3 upcoming mutations in the cyber landscape

Information system security has become a major priority for businesses, consumers and governments alike. In an environment where cyberattacks have become a daily occurrence, several European laws have been adopted in recent years to safeguard and reinforce cybersecurity and protect critical infrastructures and sensitive data.

Cybersecurity specialist: a profession under mounting pressure

By Stanislas Tarnowski

Talent drain at the DGA! The French Direction Générale de l'Armement and other government agencies involved in cybersecurity are struggling to attract and retain staff, according to a parliamentary report. This is hardly surprising, given that even the private sector – with its more attractive salaries – has a glaring shortage of cybersecurity engineers. Companies are struggling, while job seekers are rubbing their hands.

CYBER RISKS

Jean-Jacques Latour: “To date, we have not identified any new threat linked to artificial intelligence”

 By Patricia Dreidemy

When Cybermalveillance.gouv.fr presented its 2023 activity report on Tuesday, it raised the hot topic of the use of artificial intelligence in cyberattacks. While cybercriminals, like everyone else, use AI to their advantage, it remains just one tool among many to make their malicious acts ever more sophisticated, with phishing remaining the main vector.

PROSPECTIVE

« Her »: an intimate, futuristic drama that examines the relationships between a hybrid couple

 By Olivier Parent

It may be director Spike Jonze's only science fiction movie, but when we think about it, is it really futuristic? Isn't it more of a romance? Or a psychoanalysis of two people? Or perhaps it is a face-to-face look behind the scenes of a couple involving a human and a machine.

InCyber Forum Europe

March 26, 27 & 28

The FIC, renamed as the InCyber Forum, will take place from March 26 to 28, 2024, in Lille. Its theme will be: « Ready for AI? Reinventing cybersecurity in the era of AI. »

In its 16 years of existence, the FIC Européen – Forum International de la Cybersécurité then Forum InCyber – has become the continent's biggest cybersecurity and digital trust event, with 20,000 participants, 650 partners, 530 speakers and 82 countries represented in 2023. Thanks to the support of the Quebec, Canadian, Texan and French authorities, the event crosses the Atlantic to become an alternating event between Europe and the Americas.
