THE EDITO

By Jérôme Valat

Graduated from Centrale Lyon, Jérôme Valat founded and managed Oxya, a leader in SAP outsourcing and technical consulting. He co-founded Cleyrop, a publisher of a turnkey, sovereign and secure Data & AI platform and winner of the French Tech 2030 award. Jérôme Valat is also a start-ups mentor for the IME.
2024: Regulation and Cyber-Surveillance, a Pivotal Year for the Cloud Market

While 2024 is undoubtedly the year of generative AI, it will also be decisive for cloud providers, both due both to their direct contributions to the issue of AI and through the creation or modification of certain regulations.

DRAWING of the **MONTH**

"Deepfakes, or the art of digital deception"

Welcome to another episode of "InCyber Décrypte", where we plunge into a digital universe that blurs the boundaries between reality and fiction. Today we explore a phenomenon that is as fascinating as it is worrying: deepfakes, or the art of digital deception.

CYBER CRIMINALITY

OSINT in the judicial process: a growing phenomenon

By Fanny Tan

From collecting open-source evidence to presenting it in court, challenges persist. However, several tools and initiatives are emerging to facilitate and enhance OSINT's integration into the judicial framework.

CYBER RISKS

The 2024 Olympics: is algorithmic video

PROSPECTIVE

"Cyberpunk: Edgerunners": an anime series that treats

surveillance a danger?

By Pascal Coillet-Matillon

Some see the technology being tested at the 2024 Olympic Games as a slippery slope toward a society of widespread surveillance. Others believe that it poses no danger. Which is true?
